ASSEMBLY TOOL AND MATERIAL HANDLING SPECIALISTS

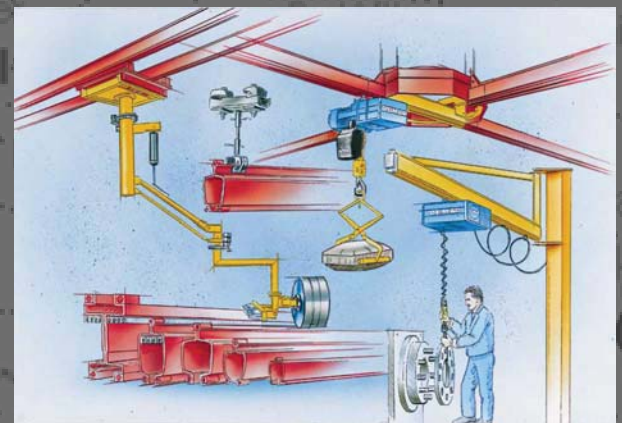

Rode Tool & Hoist

Rode Tool & Hoist

Rode Tool & Hoist is a full service manufacturer and distributor of material handling equipment. Rode Tool & Hoist is the exclusive Midwest distributor for Bosch Production Tools, Inc. and Bosch Rexroth tightening products. Located in Angola, Indiana, we specialize in fastening, torque reaction and parts handling solutions. Our experienced staff has been providing assembly tool and material handling solutions to the (MVI) motor vehicle and (GI) general industry markets for over 20 years. The name brand products and services we provide are widely used by today's leading manufacturers.

Our engineered products and services are designed to increase productivity, improve quality, and enhance the ergonomics of your manufacturing operation. From start to finish, our design team will work with you to develop the best solution for your needs.

Require installation or start up support? No problem! Rode Tool & Hoist provides turnkey installation services.

We are committed to total customer satisfaction.

Manufactured Products

Torque Tubes

The Torque Tube protects the operator from nutrunner torque reaction. Torque tubes offer zero gravity balancing for single and multiple spindle nutrunners.

- Standard models available up to 575 Nm
- Custom travel distances, higher torque models and balancing capacities are available

Special Tool Holders

Trombone Tool

Standard and custom tool holders available for all name brand power tools.

Scissor Tool

Rotational Tool Holder

Fixed Tool Holder

Torque Arms

Torque Arms increase fastening accuracy and consistency. Eliminates torque reaction and operator fatigue. Also provides zero gravity tool balancing.

- Standard models available up to 575 Nm
- Bench, Floor, Column, and Carriage mounted models
- Custom reach, travel, and high torque models available

Multiple Nutrunners

Designed to increase productivity

- Fixed and adjustable centers
- For use with right angle and inline tools
- Electric and pneumatic models
- Designed for all name brand power tools

Linear Rail

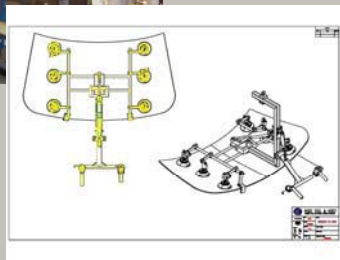

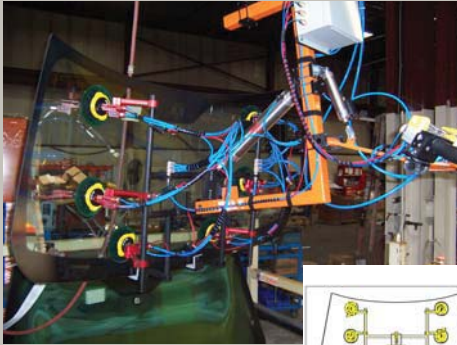

Used when torque tubes or torque arms are not practical. Keeps the operator's work area efficient and absorbs torque reaction.
